# You should look at the following URL's in order to grasp a solid understanding
# of Nginx configuration files in order to fully unleash the power of Nginx.
  https://www.nginx.com/resources/wiki/start/
  https://www.nginx.com/resources/wiki/start/topics/tutorials/config_pitfalls/
  https://wiki.debian.org/Nginx/DirectoryStructure
  In most cases, administrators will remove this file from sites-enabled/ and leave it as reference inside of sites-available where it will continue to be
  updated by the nginx packaging team.
  This file will automatically load configuration files provided by other
 applications, such as Drupal or Wordpress. These applications will be made available underneath a path with that package name, such as /drupal8.
  Please see /usr/share/doc/nginx-doc/examples/ for more detailed examples.

Welcome to nginx!

If you see this page, the nginx web server is successfully installed and working. Further configuration is required.

For online documentation and support please refer to <u>nginx.org</u>. Commercial support is available at <u>nginx.com</u>.

Thank you for using nginx.
